

Accelerate AS2 Initiatives

Sterling Managed AS2 Gateway

Supporting AS2 isn't a simple undertaking. The first protocol with strict requirements for authentication, encryption, non-repudiation, and data integrity, AS2 requires specialized expertise to set up and manage correctly. In fact, companies faced with AS2 compliance mandates often bring on dedicated staff to manage them.

But for customers of Sterling Collaboration Network, it just takes a phone call. By adding Sterling Managed AS2 Gateway, you can comply with AS2 mandates without the expense of having to build complex infrastructure for secure Internet communications, and smooth the way for your suppliers to make the switch to AS2.

Communicate efficiently and transparently with AS2-based customers and partners

With Sterling Managed AS2 Gateway, you can continue sending EDI documents just as you normally do. We provide the AS2 interface to

your customers and partners that require AS2 communications. Going the other way, we receive documents from your AS2 partners, decrypt them, and forward them to you using your preferred protocol. Using the gateway is just as fast and secure as going direct, and our role is completely transparent.

Connect to any company, anywhere, now and in the future

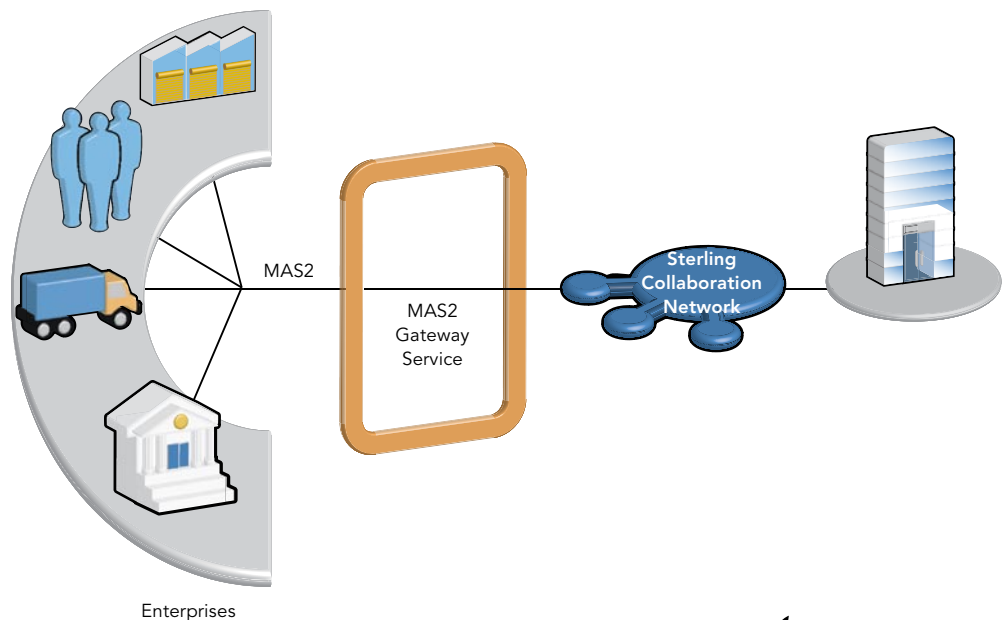

With Sterling Managed AS2 Gateway, you don't have to worry how many of your current customers or partners switch to AS2 and start issuing communications mandates. You can connect to any company, anywhere, adding as many AS2 accounts as you need.

Easily comply with AS2 mandates

Sterling Managed AS2 Gateway serves as a secure intermediary between Internet-based and non-Internet-based partners, managing all the differences in communications, format, content,

The Sterling Managed AS2 Gateway:

- Accommodates Internet-based access protocols and encryption methodologies
- Manages the exchange of data between Internet-based and non-Internet-based partners
- Allows non-Internet-based partners to retain their EDI operations
- Meets the needs of companies of all sizes

and security between EDI-INT and non-EDI-INT transactions. To activate the service, simply contact Sterling Commerce. Our experienced staff will take it from there, answering your questions and collecting any information required to get you up and running quickly.

**Smooth your supply community's
transition to AS2**

Sponsor companies that need to drive adoption of AS2 across their supply community can use the AS2 gateway to maintain a steady flow of transactions during the transition period — or to continue doing business electronically with customers who do not support AS2 communications. Simply ask your non-compliant customers to send their transactions through Sterling Collaboration Network. When we receive their documents, we'll encrypt the data and send it to you using AS2. To send documents to non-compliant partners, connect to Sterling Collaboration Network and we'll deliver them in any format your partners require, sending you receipt acknowledgements using AS2.

**You can rely on our expertise
in AS2 compliance**

No company has more experience helping customers automate their B2B processes than Sterling Commerce. That's why we're uniquely qualified to offer AS2 gateway services at a competitive cost. Contact us today at 800-299-4031 and find out how we can help you meet AS2 compliance mandates, now and in the future, without the expense of changing the way you do business.
